

Aurelia Bold S 22 LED Pendant

Patrick Jouin, 2021

Aurelia (scientific latin genus of the jelly fish) was designed for Leucos in 2021 by the esteemed Patrick Jouin (Ether, Reed and Mercure). Aurelia's translucent jelly fish shaped glass body floats through space trailing light via a direct light down its hand finished metal funnel while a hidden indirect LED ring on top of the funnel illuminates the hand-blown glass diffuser. Both direct and indirect lighting elements (user replaceable integrated LEDs) are independently dimmable creating the ability to create atmospheric mood lighting, functional down light or any combination of the two.

Diffuser Finish Options:

Transparent
 Smoke Grey

Structure Finish Options:

Gloss Warm White
 Matte Gunmetal
 Vintage Brass

SKU(s):

0011513	Smoke Grey/Gloss White, 2700K
