

Celine 35 Wall Lamp

Leucos Design Lab, 2002

The Celine Wall lamp floats a simple, half drum shaped glass diffuser on the wall. The Celine was designed by Leucos Design Lab to be a minimal and warm solution versatile enough for many applications. Its handblown diffuser is made of multiple layers of glass to create a rich, white look. This traditional Murano handblown glass technique is called *incamiciato* (Italian for "jacketed" or "layered"), which requires multiple layers of glass during the blowing process to create perfect diffusion.
