You spot it from afar

LEUCOS

Over sixty years of lighting history

LEUCOS was born in 1962 near Venice, where craftsmanship is synonymous with art.

Since the beginning, we have been known for creating lamps of unmistakable quality and unparalleled beauty. The handblown glass represents the local tradition, but behind every new project there is a broader ambition.

With a deep passion for timeless beauty, we are continuously driven to innovate and elevate our modern classics. Our formula is a combination of design, materials, manufacturing techniques, technologies, and exceptional human resources.

We offer both standard products with a high degree of customization options and fully bespoke solutions. Our mission is to cultivate value for our clients, partners, and company.

This drives us to produce beautiful, expertly crafted, dependable, efficient, and long-lasting products through innovation and simplification.

Our commitment to excellence shines in every product we create.

You spot it from afar.

AELLA collection

Conceived in 1968 by the creative minds of designers Renato Toso and Noti Massari, the Aella Collection represents the essence of Leucos' timeless design.

Aella is the “tornado” embodied by the soft curves of the handblown glass diffuser, swirling to capture a harmonious and evanescent cyclone of light. The light emits as a gentle flame, evenly spreading throughout the room.

With three sizes available for both table and suspension versions, as well as multiple combinations of colors for the structure and diffuser, Aella caters to diverse needs, allowing you to tailor the ambiance to your preference. The user-friendly, easily replaceable LED light sources ensure longevity and easy maintenance, thanks to a smart disassembly system, making Aella a perfect fit for any space.

Now expanded beyond table and suspension versions, the collection includes the AELLA TR floor lamp, featuring a longer matte black extruded aluminum body that provides a majestic presence and stability while maintaining the iconic design's lightness.

After more than 50 years, LEUCOS unveils a special edition of its iconic Aella collection by Toso & Massari. The Aella T 45 “Openworked” is a tabletop lamp inspired by Swiss watches, showcasing its intricate mechanics rather than concealing them.

AELLA T Openworked

The Aella T 45 Openworked special edition balances timeless elegance with a bold, transparent design that redefines the original 1968 model. Featuring a hand-blown glass diffuser with a unique white spot, each lamp is individually crafted, ensuring no two are identical. The transparent base reveals natural copper stems that oxidize over time, adding character to the piece.

The LED light (2700K or 3000K) is powered through these stems. A brushed stainless steel plate beneath the base highlights the lamp's name, production year, and the designers' signatures. Exclusive packaging further enhances the special edition experience.

STACKING collection

Designed by Rockwell Group, the Stacking Collection merges cutting-edge technology with traditional glassmaking techniques. It includes three sets of floor lamps and horizontal and vertical pendant lights.

The floor version, conceived in 2007, pays homage to the Venetian glassmaking tradition through the “incamiciato” technique, layering multiple glasses to create unique colors and opacities. When the cylindrical modules overlap, they cast a sophisticated ambient light.

Sixteen years later, the collection expanded with suspended lamps, featuring cylindrical diffusers powered by 5 high-quality LED strips and decorative blown borosilicate glass. Available in three sizes for vertical pendants and two for horizontal ones, the suspended range can be arranged in clusters to create beautiful and captivating lighting compositions. Stacking S is now available in new finishes: Satin Black, Metallic Titanium, and Metallic Petrol Blue, with machined aluminum end-caps in matte black or anodized aluminum, which secure the structure and serve as suspension anchoring points.

In 2024, the Stacking S H RIG debuts, showcasing ribbed borosilicate glass for enhanced lighting effects. Available in the new Tabacco and Transparent finish, this version offers an elegant addition to the collection.

The “Naked” version without decorative glass is also available.

AURELIA collection

Designed by the visionary Patrick Jouin, Aurelia is a breathtaking collection of suspension lamps in which functionality and craftsmanship meet aesthetics and elegance.

Aurelia is equipped with a downwards direct light source and an upwards indirect light ring. The metal structure contains and hides from sight all electronic and heat-dissipation elements. The LED light sources are user-friendly and easily replaceable, ensuring longevity and easy maintenance thanks to a smart disassembly system.

Available in two shapes and two sizes, Aurelia Collection offers several color combinations for the handblown glass diffuser and the metal structure.

LIGHTBODY collection

Lightbody is a piece by Jörg Hugo, a designer exploring the relationship between materiality, form, and space.

Available in floor/table and suspended versions, Lightbody's glass diffuser is completely hand made using the "free blown" glass technique. This artisanal method requires a glassmaker maestro to shape the glass without the constraints of molds, giving life to a unique and unrepeatable lamp every time.

Shielded by the glass, the light comes out with a warm, atmospheric quality. The bright bulb accentuates the unique contours of the glass with lively highlights.

Available in several color combinations both for floor/table and suspended versions, Lightbody brings a handcrafted elegance to your lighting choices.

ETHER collection

Designed by Patrick Jouin, Ether is a cascade of borosilicate blown glass bubbles available in three different sizes (Ether S, Ether S 90 and Ether S 150). It can be customized on demand into any size, finish, and configuration. Also available with an optional remote controlled RGB LED. Ether is light and airy yet creates hypnotizing visual impact.

JJ collection

The JJ Collection offers one of the most extensive ranges on the market, from table to floor and pendant versions, including JJ Small, JJ Mid, JJ Big, JJ Great, and the latest JJ Grip.

These large-scale, matte lacquered aluminum lamps are available in six outdoor-grade finishes with UV protection: White, Black, Amarant Red, Mica Blue, Sablé Grey, and Rust Brown, with a matching steel base.

The interior of the diffuser is finished in white lacquer, and custom colors are available upon request.

Both indoor and outdoor versions are available, equipped with dimmable, user-replaceable LED light sources. Lighting control options include a push-dim on the cord or wireless CASAMBI® Smart Lighting Control, combining classic design with modern technology for versatile spaces.

Standard and bespoke projects

LEUCOS offers both standard products with a high degree of customization options and fully bespoke solutions.

The close association with ALU, a well-known display solutions provider for the retail design industry, enabled LEUCOS to acquire great new engineering and project management skills. These new strengths will be put to good service in the development of the LEUCOS product range of the future as well as a few selected custom projects.
